2015

Benoit, F., Martin, C., & Malai, D. (2015). *A public policy competency framework for public health actors*. Montréal, Québec: National Collaborating Centre for Healthy Public Policy. Available online at: http://www.ncchpp.ca/165/Publications.ccnpps?id_article=1513

This document represents an effort to develop a full competency framework for public health actors in their public policy-related work. Its objective is to stimulate reflection regarding the competencies required to fulfill public health functions related to public policy.

2014

Gauvin, F.-P. (2014). *Understanding policy development and choices through the "3-i" framework: Interests, ideas and institutions*. Montréal, Québec: National Collaborating Centre for Healthy Public Policy. Available online at: http://www.ncchpp.ca/165/Publications.ccnpps?id_article=1077

This briefing note belongs to a series on the various models used in political science to represent public policy development processes. Each of these briefing notes begins by describing the analytical framework proposed by a given model. Then we set out to examine questions that public health actors may ask regarding public policy, while keeping in mind the perspective that this model affords. This document introduces the "3-i" framework, a theoretical framework that helps explore how interests, ideas, and institutions interact to influence, and ultimately, form policy developments and choices.

Morrison, V., Gagnon, F., Morestin, F., & Keeling, M. (2014). *Keywords in healthy public policy*. Montréal, Québec: National Collaborating Centre for Healthy Public Policy. Available online at: http://www.ncchpp.ca/165/publications.ccnpps?id_article=1206

This document explores the meanings of three expressions that are commonly used in public health, following the notion of keywords originally developed by Raymond Williams.

2013

Benoit, F. (2013). *Public policy models and their usefulness in public health: The stages model*. Montréal, Québec: National Collaborating Centre for Healthy Public Policy. Available online at: http://www.ncchpp.ca/165/Publications.ccnpps?id_article=966

This briefing note belongs to a series on the various models used in political science to represent public policy development processes. Each of these briefing notes begins by describing the analytical framework proposed by a given model. Then we set out to examine questions that public health actors may ask regarding public policy, while keeping in mind the perspective that this model affords. This briefing note introduces the stages model in public policy, a model that allows one to present the complex process of public policy development.

2008

Fafard, P. (2008). *Evidence and healthy public policy: Insights from health and political sciences*. Montréal, Québec: National Collaborating Centre for Healthy Public Policy. Available online at: http://www.ncchpp.ca/165/Publications.ccnpps?id_article=160

Policy makers are often challenged when producing public policy to consider the role of evidence, especially scientific evidence. CPRN Research Fellow Patrick Fafard (University of Ottawa) explores this challenge in Evidence and Healthy Public Policy: Insights from Health and Political Sciences which was produced for the National Collaborating Centre for Healthy Public Policy in collaboration with the Canadian Policy Research Networks.

Update: March 2017

The National Collaborating Centre for Healthy Public Policy (NCCHPP) seeks to increase the expertise of public health actors across Canada in healthy public policy through the development, sharing and use of knowledge.

The NCCHPP is one of six centres financed by the Public Health Agency of Canada. The six centres form a network across Canada, each hosted by a different institution and each focusing on a specific topic linked to public health. In addition to the Centres' individual contributions, the network of Collaborating Centres provides focal points for the exchange and common production of knowledge relating to these topics. The National Collaborating Centre for Healthy Public Policy is hosted by the Institut national de santé publique du Québec (INSPQ), a leading centre in public health in Canada.

Production of this document has been made possible through a financial contribution from the Public Health Agency of Canada through funding for the National Collaborating Centre for Healthy Public Policy (NCCHPP). The views expressed herein do not necessarily represent the views of the Public Health Agency of Canada.
